

Flexlite GXe **BUILT FOR TOUGHNESS, APPROVED BY THE BEST**

The Flexlite GXe MIG/MAG torch series is built to meet the demands of professional welders who need reliability, precision, and durability in every weld. Designed for demanding welding tasks, the Flexlite GXe enables excellent control, precision, and comfort – day after day, weld after weld.

Flexlite GXe

Developed using customer feedback, the GXe MIG/MAG welding torches feature a structure that enhances durability, improves welding characteristics, and ensures optimal balance for greater control and comfort, even in the most challenging environments. A 6-month warranty backs its performance, underscoring its reliability and cost-efficiency.

Ensure durable and reliable high-quality welds with the next generation welding torch

- Long, cost-efficient lifetime
- Three value levels (Series 3, 5, and 8) are available with gas- and water-cooled versions
- IP5X Protected against dust and humidity
- Improved handle grip features and shape for better ergonomics
- Built-in LED work light illuminates the area around the contact tip (Series 8)
- Multi-Neck system torch models available (Series 5)
- Lightweight on-torch remote control options
- Redesigned and patented ball-joint cable is optimized for smoother wireline and reduces wrist load (Series 5 and 8)
- Coaxial cable Kemppi Flexcoax with coaxial bending support delivers high flexibility (Series 3)
- Compatible with all GX-series consumables

Which model?

GXe is available in water- and gas-cooled models.

Series 3 with Euro connector and Kemppi Flexcoax cable.

Series 5 with Euro connector and hose package.

Series 8 with Euro and Amphenol connectors and integrated on-screen remote control.
